

PING PONG

Kickstart the new school year with the ping pong craze that's taking the UK by storm!

Schools across the UK are queueing up, bats in hand, to find out more about T3 Ping Pong and their circular ping pong table – a world first – on which 3-a-side ping pong can be played.

Unveiled last year at Olympic legacy event 'Give It a Go' on London's Hampstead Heath, the table and the game are rapidly acquiring fans who love the social aspects to playing with 6 people (or up to 12 if playing our 6-a-side game). See the game featured here on the BBC - <http://www.bbc.co.uk/sport/0/get-inspired/25715800>

With the government's renewed focus on improving physical education and sport in schools, there's never been a better time to consider new sporting activities which your pupils will enjoy (and want to continue playing as they grow up). With this in mind, the T3 range includes a full size table (great for the staff room!) as well as small and mid-sized tables perfect for small children through to teens.

Satisfied customer, head teacher Lynne Gavin at Pakeham Primary (National Primary School of the Year 2013) said, "We are absolutely delighted with the new table - it's been so much fun already. Most of us had never seen anything like it. Table tennis club next year will be brilliant as this new table adds an exciting twist to the game and it will enable us to have more children in the club too. So far it's been all smiles and laughter - and lots of creativity as we have been devising new games to play on it."

Staff at Pakeham Primary try out the T3 before the children jump in

The unusual circular design and specially constructed nets are the foundations of a game which is fast and fun. 3-a-side ping pong offers players a greater range of shots increasing the scope for spectacular rallies. Perfect for pint-sized players (3-6 yrs) – The T3 SuperMini encourages young players to get involved in sport. The T3 SuperMini table with matching mini bats gives 3-6 year olds the perfect start. The child friendly table with no sharp edges has been carefully scaled down to size as have the bats. For the first time small hands will be able to get around the bats and get to grips with the game. The next step up (6-9 yrs) is the T3 ONE70, perfect for Key Stage 2 children at 1.7m in diameter and 58 cm high. The T3ONE70 can also be ordered at full height (76cm) for everyone to use if you don't have space for a full size T3 Tournament table (2.74m diameter).

For more information on the game, how to play and the full range of T3 tables, visit www.t3pingpong.com
